**Patient ID:**  
**Gender:**  
**Date of Birth:**  
**Home Phone:**  
**Referring Physician:** WRATTEN, NEISHA K  
**Organization:** North Adelaide

**Accession Number:** BR-3062617-MR  
**Requested Date:** June 1, 2016 08:56  
**Report Status:** Final  
**Requested Procedure:** 3004990  
**Procedure Description:** MRI PELVIS  
**Modality:** MR

## **Findings**

**Radiologist:** COWIE, JENNIFER

## **MRI PELVIS**

### **Summary:**

**No Mullerian duct abnormality.**

**Unusual uterine morphology with retroversion and antelexion ? adhesion related.**

**No tubal dilatation or infiltrating cul de sac endometriosis identified.**

### **Clinical:**

History of multiple surgeries. Bowel surgery. ?recurrent endometriosis.

### **Technique:**

Multi-parametric pelvic MRI fertility protocol including Volumetric 3D Coronal T2 plus reconstructions, T1 axial pre/post fat saturation.

### **Findings:**

#### **Uterus:**

##### **Size & morphology:**

6.2 x 3.1 x 4.4cm. The uterus is retroverted and antelexed. No Mullerian duct abnormality is identified.

##### **Endometrial thickness:**

2mm. No endometrial lesions seen.

##### **Junctional zone:**

Anterior JZ 8mm, fundal JZ 5mm, posterior JZ 7mm. No submucosal microcyst seen.

##### **Uterine lesions:**

None seen.

#### **Left Ovary:**

##### **Position:**

Left adnexa adjacent to the fundus.

##### **Size:**

2.0 x 1.1 x 2.5cm.

##### **Follicle(s):**

Seven follicles <10mm.

Lesions and/or endometrioma:

None seen.

**Right Ovary:**

Position:

Right adnexa adjacent to uterine fundus.

Size:

3.1 x 1.9 x 2.1cm.

Follicle(s):

Six follicles <10mm.

Lesions and/or endometrioma:

None seen.

**Adnexa:**

No tubal dilatation. No significant free fluid. No infiltrating endometriotic deposit seen.

**Other Findings:**

Nil significant.
