

ENDOMETRIOSIS PELVIC MRI ASSESSMENT –

BR PROFORMA REPORT BLIND REVIEW

Uterus

Absent

Present

Uterine anatomy

- Conventional
- Arcuate
- Septate
 - a. Full septum
 - b. Subseptate
- Bicornuate unicollis
- Bicornuate bicollis
- Didelphys
- Other (free text enabled).

Uterine Lie (can be more than one selection)

- Anteverted
- Anteflexed
- Retroverted
- Retroflexed
- 5. Axial
- Others (please specify) (Free text enabled)

Uterine Size (body + cervix - 3 planes in mm)

(Free text).

82x49x40mm

Endometrial thickness (sag plane in mm to nearest mm)

(Free text)

Endometrial lesions

- Not identified.
- 2. Present. Polyp.

2b-1: No. of polyps (free text)

2b-2: Size of each polyp. (free text)

Adenomyosis

- 1. No MRI supportive features
- 2. Supportive MRI features as described:
 - Submucosal cysts.
 - Abnormal junctional zone thickening and measurement
 - Anterior (mm)
- Fundal (mm)
- Posterior (mm)

Presence of an adenomyoma

- 1:)
- No
- 2: Yes

Fibroids

- 1:
- No Yes
- 2a: Number of fibroids:
- 2b: Largest fibroids (location and size mm all

fibroids >10mm and/or iimpact on the cavity) - (Free text)

- Submucosal fibroids
 - 2b-0: No

REVIEWER INITIALS

2b-1: Yes

2b-1-1: (description: free text)

Left ovary

- 1: Absent (Branching logic - move to "Right ovary")
- 2: Present

Left ovary size (3 planes and volume)

- 1. NN x NN x NN mm 38 x 45 x 48 mm
- 2. Volume (above x 0.52).

Left ovary follicle measurements and count

- 1. N follicles between 2 and 9 mm in diameter
 - a. (Free text)
- 2
- 2. N follicles > 9 mm
 - a. (Free text)
- Dominant follicle
- a.
- b. \ N.

Left ovary position

- Lateral adnexa. Unremarkable. 1:
- High positioning in iliac fossa.
- 3: Tethered/ distorted appearances - (may be multiple options)
 - 3a: Intimate relationship to the lateral uterus
 - 3b Intimate relationship/ tethering to adjacent bowel.
 - 3c. Tethering to pelvic sidewall
 - 3d:Tethering to the uterosacral ligament

3b Intimate relationship/ tethering to

3a:

Present

SUBJECT ID = RR

3b:

Absent

Fat component (T1/T2 hyperintense. Low signal on fat suppression).

4a:

Present.

4b: Absent.

Adnexa

1: Hydrosalpinx

1a:

No

1b: Yes

2: Hematosalpinx

> 2a: (No

2b: Yes

3: Other (free text).

Are both ovaries immediately approximated "kissing"?

1:

No

2: Yes

Urinary bladder nodule

Definition: Is there presence of a nodule in the bladder.

1:

Absent

2: Present

> Size: NN in millimetres (mm) 2a:

Uterovesical region

Definition: Assessment of whether there is a visible preserved fat plane +/- physiologic fluid +/- absent distortion between the anterior uterine serosa and bladder.

Normal.

2: Abnormal.

> 2a: (free text if required)

Ureteric nodule(s)?

Absent

Present

2a: Location (free text + distance to ureteric

orifice/VUJ)

2b: Size (mm)

Pouch of Douglas obliteration

Definition: Assessment for abnormal loss of fat plane +/physiologic fluid and immediate approximation of rectosigmoid and/or small bowel to the posterior uterine serosa, cervix +/- vaginal wall.

Discrete linear bands may be visible ($\sqrt{T1}$, $\sqrt{T2}$)

1: Negative

Partial

2a: Left

2b: Right

3:

2:

Complete

3a: Positive = obliteration.

3b:

Positive = band adhesions.

Nodules present on the posterior vaginal fornix?

Definition: Thickening of superior 1/3 of posterior vaginal wall +/- nodularity. Nodules: ↓ T2 ↑T1 (if active haemorrhagic deposits).

No

2: Yes **REVIEWER INITIALS**

2a: Dimension of nodule to be measured in

millimetres (mm).

2b1: Inactive.

2b2: Active

Vaginal forniceal elevation?

Definition: Upper level of fornix on sagittal view is superior to the angle of the uterine isthmus with stretching of vaginal wall, and/or acute angulation of the fornix.

1: No

2:

Yes 2a: Left.

2b: Right

2c: Left and Right.

Rectovaginal nodules present?

Definition: Presence of deep infiltrating endometriosis in the anterior rectal wall and posterior vaginal fornix, located below the peritoneum of the Pouch of Douglas. Inactive/ fibrotic disease characterised as \downarrow T1 \downarrow T2 signal.

Active disease as ↑T1, ↑ to intermediate- T2 signal (hemorrhagic/ proteinaceous content + glandular deposits).

1: No

2:

Yes

2a: Size (mm)

2b1: Inactive.

2b2: Active

Uterosacral ligament nodules or thickening?

Definition: Inactive/ fibrotic disease nodules characterised as \downarrow T1 \downarrow T2 signal.

Active disease as ↑T1, ↑ to intermediate- T2 signal (hemorrhagic/proteinaceous content + glandular deposits).

1: No

2: Yes nodules

> 2a: Left

> > Size (mm) 2a-1:

2b: Right

> 2b-1: Size (mm)

2c1: Inactive.

2c2: Active

Yes thickening.

3a: Left.

3b: Right

3c: Both.

Retrocervical nodule present?

Definition: Inactive/ fibrotic disease characterised as \$\square\$ T1 ↓ T2 signal.

Active disease as ↑T1, ↑ to intermediate- T2 signal (hemorrhagic/ proteinacous content + glandular deposits).

No 2: Yes

Size (mm)

2b1: Inactive.

2b2: Active Rectum and colon:

Is there bowel deep infiltrating endometriosis seen?

Definition: Inactive/fibrotic disease characterised as \$\square\$ T1 ↓ T2 signal.

Active disease as ↑T1, ↑ to intermediate- T2 signal (hemorrhagic/ proteinacous content + glandular deposits). "Mushroom cap sign" is specific to severe invasive bowel endometriosis and is characterized as a plaque with \downarrow T2 at its 'base' and 个 T2 at its 'cap'.

1:

No

Yes

2a: Distance from the anal verge

Length (mm)

2b: Lesion type

> 2b-1: Isolated lesion

2b-2: Multiple lesions

2b-3: Curved lesion

2b-4: Straight lesion

Maximal depth layer of invasion each 2c:

leasion (muscularis, submucosa,

mucosa).

Lesion 1: (free text)

2c-1: Lesion 2 (free text) - delete if (2c-2:

not relevant

(2c-3 etc.)

Is it stuck to any structures or free lying? 2c:

> 2d-1: Vagina

2d-2} Uterus

2d-3: Uterosacral ligaments **REVIEWER INITIALS**

Ovary Plague thickness 2d:

2a: 1-5mm.

2b: 6-10mm.

19m . 2c: >11mmွဲ

Activity 2e:

> 2f1: Inactive.

2f2: Active.

2f: "Mushroom cap" appearance:

Present.

2g2: Absent.

Is there evidence of tethering of the bowel?

No

2: ` Yes, tethered to

> 2a; Uterus

2b: L. ovary

2c: R. ovary

2d: L. uterosacral ligament nodule

2e: R. uterosacral ligament nodule

2f: L pelvic side wall.

2g: R pelvic side wall.

2h: Other.

Any other salient findings on the study:

Yes

(Free text).
