ENDOMETRIOSIS PELVIC MRI ASSESSMENT -

BR PROFORMA REPORT BLIND REVIEW

Uterus

1:

Absent

2:

Present

Uterine anatomy

Conventional

- Arcuate
- 3. Septate
 - Full septum
 - b. Subseptate
- Bicornuate unicollis
- Bicornuate bicollis
- Didelphys
- 7. Other (free text enabled).

Uterine Lie (can be more than one selection)

- Anteverted
- Anteflexed
 - Retroverted
 - Retroflexed
 - 5. Axial
 - Others (please specify) (Free text enabled)

Uterine Size (body + cervix - 3 planes in mm)

1. (Free text).

81 x 63 x 46 mm

Endometrial thickness (sag plane in mm to nearest mm)

(Free text)

Endometrial lesions

1. Not identified.

2b-1:

No. of polyps (free text)

2b-2:

Size of each polyp. (free text)

Adenomyosis

- 1. No MRI supportive features
- Supportive MRI features as described:

1. Submucosal cysts.

Abnormal junctional zone thickening and measurement

Anterior (mm)

ii. Fundal (mm) iii. Posterior (mm)

Presence of an adenomyoma

No

2: Yes

Fibroids

1:

No

2:

Yes

2a:

Number of fibroids:

Largest fibroids (location and size mm all 2b:

fibroids >10mm and/or iimpact on the cavity) - (Free text)

2b: Submucosal fibroids

2b-0:

No

REVIEWER INITIALS

2b-1: Yes

2b-1-1: (description: free text)

Left ovary

1: Absent (Branching logic - move to "Right ovary")

2:

Present

Left ovary size (3 planes and volume)

1. NNXNNXNNmm 31x 19x 23mm

2. Volume (above x 0.52).

7.100

Left ovary follicle measurements and count

1. N follicles between 2 and 9 mm in diameter

(Free text)

18

2. N follicles > 9 mm

(Free text)

0

Dominant follicle

a.

Left ovary position

Lateral adnexa, Unremarkable, 1:

2: High positioning in iliac fossa.

3: Tethered/ distorted appearances - (may be multiple options)

3a: Intimate relationship to the lateral uterus

3b Intimate relationship/tethering to adjacent

bowel.

3c. Tethering to pelvic sidewall

3d:Tethering to the uterosacral ligament

3e:

Other: (free text)

Left ovarian endometrioma

No

Yes

Size: NN in millimetres (mm) 1a:

> T2 shading (intermediate/low 1b:

homogeneous T2 signal).

1b-0: No

Yes 1b-1:

T1 fat sat hyperintense 1c:

> 1c-0: Absent

> > Present

Internal nodularity, septation or other 1d:

complexity.

1c-1:

1d-1: No

1d-2: Yes

1-d-2-1: (Free text)

Left ovarian lesions/cysts other than suspected

endometriomas

- 1: Not classifiable
 - Lesion features

2a: Unilocular cyst

Unilocular-solid cyst 2b:

2c: Multilocular cyst

Multilocular-solid cyst 2d:

2e: Solid

Vascularity (post gadolinium enhancement). 3:

> 3a: Present

3b: Absent

4 Fat component (T1/T2 hyperintense. Low signal on fat suppression).

> 4a: Present.

4b: Absent.

Right ovary

Absent (Branching logic - move to "Adnexa")

Present

Right ovary size (3 planes and volume)

1. NNXNNXNN mm 35 x 21 x 30 mm

2. Volume (above x 0.52). [\-5cc

Right ovary follicle measurements and count

- 1. N follicles between 2 and 9 mm in diameter
 - a. (Free text)

16

2. N follicles > 9 mm

a. (Free text)

 \circ

3. Dominant follicle

a. Y

Right ovary position

Lateral adnexa. Unremarkable.

2: High positioning in iliac fossa.

3: Tethered/distorted appearances - may be multiple options.

3a: Intimate relationship to the lateral uterus

3b Intimate relationship/ tethering to

REVIEWER INITIALS

FV

adjacent bowel.

3c. Tethering to pelvic sidewall

3d: Tethering to the uterosacral ligament

Right ovarian endometrioma

2:

Yes

No

2a:

Size: NN in millimetres (mm)

15 mm

2b: T2 shading (intermediate/low

homogeneous T2 signal).

2b-0: No

2b-1:\ Yes

2c: T1 fat sat hyperintense

2c-0: Absent 2c-1: Present

Internal nodularity, septation, complex. 2d:

ز1-2d

No

2d-2: Yes

Right ovarian lesions/cysts other than suspected

endometriomas

Not classifiable

Lesion features

Unilocular cyst 2a:

2b: Unilocular-solid cyst

2c: Multilocular cvst

2d: Multilocular-solid cyst

Solid 2e:

Vascularity (post gadolinium enhancement). 3:

> 3a: Present

SUBJECT ID = RR

3b:

Absent

Fat component (T1/T2 hyperintense. Low signal on fat suppression).

> 4a: Present.

4b: Absent.

Adnexa

1: Hydrosalpinx

1a:

1b: Yes

2: Hematosalpinx

2a:

2b: Yes

3: Other (free text).

Are both ovaries immediately approximated "kissing"?

1: No

2: Yes

Urinary bladder nodule

Definition: Is there presence of a nodule in the bladder.

1.

Absent

2: Present

> 2a: Size: NN in millimetres (mm)

Uterovesical region

Definition: Assessment of whether there is a visible preserved fat plane +/- physiologic fluid +/- absent distortion between the anterior uterine serosa and bladder.

1: Normal. 2: Abnormal.

> 2a: (free text if required)

Ureteric nodule(s)?

1:

Absent

2: Present

> 2a: Location (free text + distance to ureteric

> > orifice/VUJ)

2b: Size (mm)

Pouch of Douglas obliteration

Definition: Assessment for abnormal loss of fat plane +/physiologic fluid and immediate approximation of rectosigmoid and/or small bowel to the posterior uterine serosa, cervix +/- vaginal wall.

Discrete linear bands may be visible (\downarrow T1, \downarrow T2)

1: Negative

2: **Partial**

> 2a: Left

2b: Right

3: Complete

> 3a: Positive = obliteration.

3b: Positive = band adhesions.

Nodules present on the posterior vaginal fornix?

Definition: Thickening of superior 1/3 of posterior vaginal wall +/- nodularity. Nodules: ↓ T2 ↑T1 (if active haemorrhagic deposits)

No 1:

Yes 2:

REVIEWER INITIALS

FV

Dimension of nodule to be measured in 2a: millimetres (mm).

2b1:

Inactive.

2b2: Active

Vaginal forniceal elevation?

Definition: Upper level of fornix on sagittal view is superior to the angle of the uterine isthmus with stretching of vaginal wall, and/or acute angulation of the fornix.

1:

No

2: Yes

2a: Left.

2b: Right

2c: Left and Right.

Rectovaginal nodules present?

Definition: Presence of deep infiltrating endometriosis in the anterior rectal wall and posterior vaginal fornix, located below the peritoneum of the Pouch of Douglas. Inactive/ fibrotic disease characterised as \downarrow T1 \downarrow T2 signal.

Active disease as ↑T1, ↑ to intermediate- T2 signal (hemorrhagic/ proteinaceous content + glandular deposits).

2: Yes

No

2a: Size (mm)

2b1: Inactive.

2b2: Active

Uterosacral ligament nodules or thickening?

Definition: Inactive/ fibrotic disease nodules characterised as \downarrow T1 \downarrow T2 signal.

Active disease as ↑T1, ↑ to intermediate- T2 signal (hemorrhagic/proteinaceous content + glandular deposits).

1: No

2: Yes nodules

2a:)

Left

2a-1:

Right

2b-1:

(2c1:) Inactive.

2c2:

Active

3: Yes thickening.

3a:

Left.

Both.

3b: Right

3c:

Retrocervical nodule present?

Definition: Inactive/ fibrotic disease characterised as \$\square\$ T1 ↓ T2 signal.

Active disease as ↑T1, ↑ to intermediate- T2 signal (hemorrhagic/proteinacous content + glandular deposits).

No

Yes

2a:

Size (mm) 37 ~~

Inactive. Active

2b2:

Rectum and colon:

Is there bowel deep infiltrating endometriosis seen?

Definition: Inactive/ fibrotic disease characterised as $\sqrt{T1}$ ↓ T2 signal.

Active disease as ↑T1, ↑ to intermediate- T2 signal (hemorrhagic/ proteinacous content + glandular deposits). "Mushroom cap sign" is specific to severe invasive bowel endometriosis and is characterized as a plaque with \downarrow T2 at its 'base' and 个 T2 at its 'cap'.

Nο

Yes

2a: Distance from the anal verge

> 2a-1: Length (mm)

2b: Lesion type

> 2b-1: Isolated lesion

2b-2: Multiple lesions

2b-3: Curved lesion

2b-4: Straight lesion

Maximal depth layer of invasion each 2c: leasion (muscularis, submucosa,

mucosa).

2c-1: Lesion 1: (free text)

(2c-2:Lesion 2 (free text) - delete if

not relevant

(2c-3 etc.)

2c: Is it stuck to any structures or free lying?

> 2d-1: Vagina

> 2d-2: Uterus

2d-3:

Uterosacral ligaments

REVIEWER INITIALS

FV

2d-4: Ovary

2d: Plaque thickness

2a: 1-5mm.

2b: 6-10mm.

2c: >11mm.

2e: Activity

> 2f1: Inactive.

2f2: Active.

2f: "Mushroom cap" appearance:

> 2g1: Present.

2g2: Absent.

Is there evidence of tethering of the bowel?

No

Yes, tethered to

2a: Uterus

2b: L. ovary

2c: R. ovary

2d: L. uterosacral ligament nodule

R. uterosacral ligament nodule 2e:

2f: L pelvic side wall.

2g: R pelvic side wall.

2h: Other.

Any other salient findings on the study:

2. Yes

(Free text).
