Uterosacral ligament nodules or thickening?

Definition: Inactive/ fibrotic disease nodules characterised as \downarrow T1 \downarrow T2 signal.

Active disease as ↑T1, ↑ to intermediate- T2 signal (hemprrhagic/ proteinaceous content + glandular deposits).

1: / No

2: Yes nodules

2a: Left

2a-1: Size (mm)

2b: Right

2b-1: Size (mm)

2c1: Inactive.

2c2: Active

Left.

3: Yes thickening.

3b: Right

3c: Both.

Retrocervical nodule present?

Definition: Inactive/ fibrotic disease characterised as \downarrow T1 \downarrow T2 signal.

Active disease as $\uparrow T1$, $\uparrow to intermediate-T2 signal (hemorrhagic/ proteinacous content + glandular deposits).$

No

2: Yes

2a: Size (mm)

2b1: Inactive.

2b2: Active

Rectum and colon:

Is there bowel deep infiltrating endometriosis seen?

Definition: Inactive/ fibrotic disease characterised as \downarrow T1 \downarrow T2 signal.

Active disease as \uparrow T1, \uparrow to intermediate- T2 signal (hemorrhagic/ proteinacous content + glandular deposits). "Mushroom cap sign" is specific to severe invasive bowel endometriosis and is characterized as a plaque with \downarrow T2 at its 'base' and \uparrow T2 at its 'cap'.

// 1: /

No

Yes

2a: Distance from the anal verge

2a-1: Length (mm)

2b: Lesion type

2b-1: Isolated lesion

2b-2: Multiple lesions

2b-3: Curved lesion

2b-4: Straight lesion

2c: Maximal depth layer of invasion each

leasion (muscularis, submucosa,

mucosa).
